

# Carbon Filter Cartridge

Trusted Filtration Solutions

KETCO Carbon Filter Cartridges are the most widely used carbon devices in the world and provide previously unattainable performance at the lowest price point. KETCO Carbon Filters simultaneously remove free chlorine and organic chemicals that contribute to taste and odor. These filters are optimized for application where they perform the role of activated carbon filter.

The extrusion process allows the production of a carbon block with more carbon, but a low pressure drop. This enables a KETCO Carbon Filter to deliver extended life while removing chlorine, taste, odor and organic contaminants from water, aqueous solutions or suspensions. The KETCO Carbon Filter is widely used in filtering organic solvents and is also ideal for use in residential and commercial water purification systems, food service, pre- and post-RO systems.

Filter Dimensions	—	<b>2.50" O.D. x 1.25" I.D. x 10" L</b>
Chlorine reduction > 90%	—	<b>3,750 gallons @ 1.0 GPM</b>
Chloroform reduction	—	<b>Not recommended for this contaminant</b>
Lead reduction	—	<b>Not recommended for this contaminant</b>
Cyst reduction	—	<b>Not recommended for this contaminant</b>
Initial Delta P	—	<b>0.75 psid @ 1.0 GPM</b>
Carbon Weight	—	<b>0.75 lbs.</b>
Construction	—	<b>Precision Continuous Extrusion</b>
Carbon type	—	<b>Steam activated, Acid washed</b>
Carbon source	—	<b>Bituminous coal</b>
